

Suspended Loads Pre-Plan

Date _____
Job Name _____
Location _____
Erector _____
Erector Foreman _____

Routes for suspended loads shall be pre-planned to ensure that no employee is required to work directly below a suspended load except for employees engaged in the initial connection of the steel; or employees necessary for the hooking or unhooking of the load [OSHA 1926.753(d)]. Particular attention must be paid to the work locations of trades unrelated to steel erection.

Sketch site below. Identify haul road, staging areas, and building. Include erection sequence with crane set up areas for each sequence.

Other trades on jobsite to be notified of Suspended Loads Plan
